PROFILE

Senior product designer with **11 years** of taking products from the first research session to shipped design, across consumer apps, fintech and enterprise AI. I've designed **a consumer app with over a million downloads and a 4.6-star rating**, **AI tools used by around 35,000 people a day across 14 countries**, and **a credit platform where lenders and borrowers trust the same system**. I start with the decision a person is trying to make, explore more than one direction before converging, and treat accessibility as part of the craft, not a checklist. AI is part of my everyday work, from finding research and hunting edge cases to prototyping in code.

EXPERIENCE

Lead Product Designer · TaskUs

APR 2021 – JUL 2026

REMOTE · FOUNDING AND ONLY DESIGNER, DIGITAL IT · MULTI-TENANT PRODUCTS SOLD TO CLIENTS ON SUBSCRIPTION · AROUND 35,000 DAILY USERS IN 14 COUNTRIES

- **EvaluateUs (AI-scored assessments):** One AI-scored result, three readers: the candidate asking how they did, the assessor deciding whether to stand behind the AI's score, and the manager checking it helps the team. Spotted from the first prototypes that reporting was the real value, then designed each view around that person's next decision. **Accuracy up 17%.**
- **TaskGPT (AI for agents on live calls):** Built largely as a Chrome extension inside the tool agents already used, so no one switched apps mid-call. Behind it, a multi-tenant admin where clients were onboarded and each campaign was configured with its own tools, AI model and knowledge base. Kept AI-suggested labels only where they matched the business's own terms, and designed the instrumentation: usage, AI answer quality and guardrails, token cost and user feedback. **Call-handling time and operational costs each down 20%.**
- **LevelUp (gamification):** Managers set targets, challenges and rewards; agents compete as their own 3D characters (18 fully rigged, Three.js) with leaderboards and live wins. Everyone who takes part wins something. Became the company-wide standard and was showcased at AWS Summit London 2025.
- **AutoQA (automated call review):** The first build surfaced insight but didn't help anyone act, so I held it to its own goal: getting flagged agents into training and one-to-ones. Wrote a UX review, then worked with the SVP, director and dev manager to break fixes into small steps, cutting what phase one didn't need to protect a three-month timeline. AI hunted edge cases; my review began where it ran out.
- **Design system and accessibility:** Extended the global foundation across around 20 shipped products, adding a TaskGPT component layer and a separate theme so EvaluateUs could be sold to external clients. Designed to WCAG 2.2 AA. As the only designer, it was the only way to scale myself.
- **AI-native workflow:** Claude connected to Figma, plus Cursor, Figma Make, v0 and Lovable, used daily to explore several directions in parallel and prototype in code. **Time to concept down 60%.**

Product Designer · Mindefy Technologies

MAR 2017 – FEB 2021

INDORE, INDIA (FORMERLY MIND-E-FY SOLUTIONS) · PRODUCT STUDIO: FINTECH, PAYMENTS, WELLBEING AND CLIENT PRODUCTS · INTERN TO SOLE PRODUCT DESIGNER

- **YourHour (digital wellbeing app):** Sole designer end to end: research, prototypes, visual design, branding, design system and developer handover. Built on awareness and small wins instead of shame; I'd rather earn a habit than engineer a compulsion. **Over a million downloads, 4.6 stars, 70,000+ reviews, 22 languages, 300+ research sessions.**
- **GreenBill (fintech: paperless receipts and invoicing):** Four apps on one system: consumer, merchant web POS, merchant mobile and admin. A shopkeeper rings up a sale on their phone while the owner sees sales across every branch. My usability testing toolkit caught **85% of issues before development**.

- **JEGO (client project, UAE):** Wellbeing and mentorship platform designed right-to-left first for Gulf audiences. **Usability satisfaction up 25%.**
- **Hiring and mentoring:** Hired and mentored junior and mid-level designers for client and in-house products.

Product Design Consultant & Founder · The Artist Banda

2014 – 2017

BENGALURU, INDIA · INDEPENDENT CONSULTANCY · FINTECH, E-COMMERCE AND DEVELOPER TOOLS · EARLIER CO-RAN A PRODUCTION HOUSE WITH 200+ CLIENTS IN UNDER THREE YEARS

- **EarlyFoods (UAE):** Food for expecting mothers and young children. Analytics and the founder pointed to price; heatmaps and a survey with nearly 400 replies pointed to trust. Rebuilt the journey to lead with sourcing and certification, fixed hidden calls to action and age filters, and made reordering easy. **Sales up 33% in a month**, confirmed by a follow-up survey.
- **Repos Pay (fintech: credit for fuel delivery):** Two apps on one credit system: pump owners extending credit, and businesses applying for it and drawing it down. Each side had to trust the same system for opposite reasons.
- **ZuQA (API testing tool):** Used progressive disclosure so developers met advanced options only when they needed them. **Developer onboarding time down 15%.**

SKILLS & EXPERTISE

DISCOVERY & RESEARCH	Problem framing with PM and engineering · interviews · usability testing · surveys and heatmaps · synthesis into clear themes
DATA & OUTCOMES	Funnel and analytics review · product instrumentation (DAU/MAU, engagement, AI quality, cost) · success metrics · conversion
INTERACTION & CRAFT	Mobile and web apps · user flows, wireframes and prototypes · edge cases and error states · behavioural design and gamification · UX writing · right-to-left and multilingual
SYSTEMS & ACCESSIBILITY	Design systems from tokens to shipped components · WCAG 2.2 AA · brand guidelines · Figma libraries · developer handover specs
AI, TOOLS & CODE	Figma · Claude and Claude Code · Cursor · Figma Make · v0 · Lovable · Git, GitHub and Vercel · HTML/CSS · Three.js
COLLABORATION	Hiring and mentoring designers · feedback in both directions · working through constraints with engineers while designing · stakeholder reviews

NOTABLE WORK

- **Job App Assistant:** a live AI web app designed, coded and deployed solo in one session (Node.js + Claude API): job-app-assistant.onrender.com.
- **Aatmnirbhar Bharat mark:** entered in an open MyGov competition; later taken up by the PM SVANidhi micro-credit scheme and used by manufacturers to mark Indian-made goods.

EDUCATION

Interaction Design Foundation · UX, UI and Interaction Design — 2015 – 2017

Maya Academy of Advanced Cinematics (MAAC) · AD3D Edge+ Diploma: Design, Animation and VFX — 2012 – 2014

Bachelor of Commerce with Computer Science · B.Com and CS — 2011 – 2014
