

PROFILE

Eleven years designing digital products from both sides of the table. In-house, as founding designer on TaskUs's digital team, I shipped **around 20 AI and enterprise products** used by **around 35,000 people a day across 14 countries**. Client-side, I've run my own consultancy and studio work across **fintech, e-commerce, wellbeing and developer tools**, including YourHour, a wellbeing app with **over a million downloads in 22 languages**. I own work end to end, from stakeholder interviews and research through prototypes, design systems and shipped interfaces, and I'm as comfortable presenting to clients and executives as I am working alongside engineers. I use **agentic AI tools every day** to explore further and ship faster.

EXPERIENCE

Lead Product Designer · TaskUs

APR 2021 – JUL 2026

REMOTE · FOUNDING DESIGNER, DIGITAL TEAM · MULTI-TENANT PRODUCTS SOLD TO CLIENT ORGANISATIONS · ~35,000 DAILY USERS · 14 COUNTRIES

- **TaskGPT, AI assistance on live calls:** Designed an umbrella of AI tools for agents mid-conversation, from drafting and summarising to a Chrome extension that floated over the apps they already used. Behind it, a multi-tenant admin where clients were onboarded and each campaign configured with its own tools, AI model and knowledge base. Designed the instrumentation for adoption, AI response quality, guardrails, cost and feedback. Call-handling time and operational costs each fell 20%.
- **EvaluateUs, human judgement on AI scores:** AI scored assessments for hiring, coaching and training, and one dashboard served three people: the candidate, the assessor deciding whether to trust the AI's score, and the manager. Designed each view around the next decision rather than the available data. Accuracy in how people acted on results rose 17%.
- **LevelUp, gamification:** Managers set targets, challenges and rewards; agents compete with their own 3D characters, leaderboards and live wins, designed so everyone who takes part wins something. Became the company-wide standard and was showcased at AWS Summit London 2025.
- **AutoQA, automated call review:** Led the UX review that refocused the product from producing more insight to driving action, so agents with the most flagged calls were picked up for training and one-to-ones. Broke the fixes into small steps and scoped phase one to protect a three-month timeline.
- **Design system, scaled across around 20 shipped products:** Extended the global foundation with a dedicated TaskGPT component layer, planned to merge back for reuse, and a separate theme so EvaluateUs could be sold to external clients. Real Figma tokens, WCAG 2.2 AA, RTL-first with logical CSS.
- **Client delivery and AI workflow:** Turned client problems into shipped products with VPs, managers and developers, presenting solutions to clients before build and delivering in phases. Used Claude, Cursor, Figma Make, v0 and Lovable to explore directions in parallel, cutting time to a first concept by 60%.

Product Designer · Mindify Technologies

MAR 2017 – FEB 2021

INDORE, INDIA · PRODUCT STUDIO: CONSUMER APPS, FINTECH AND CLIENT PRODUCTS · SOLE DESIGNER · HIRED AND MENTORED DESIGNERS

- **YourHour, digital wellbeing:** Sole designer end to end: research, flows, prototypes, branding, design system and handover. Over a million downloads, 4.6 stars from 70,000+ reviews, 22 languages, grounded in 300+ research sessions. Non-punitive by design: awareness and small wins instead of shame.
- **GreenBill, paperless receipts and invoicing:** Four connected apps for consumers, merchant point-of-sale, merchant mobile and admin. A usability testing toolkit caught 85% of issues before development.

- **JEGO, client project:** Wellbeing and mentorship platform designed RTL-first for Gulf audiences. Usability satisfaction up 25%.
- **Kidster, digital school diary:** Attendance, homework, parent-teacher meetings and notices in one place for teachers and parents.

Product Design Consultant & Founder · The Artist Banda

2014 – 2017

INDEPENDENT CONSULTANCY · FINTECH, E-COMMERCE, DEVELOPER TOOLS AND BRAND · EARLIER CO-RAN A PRODUCTION HOUSE WITH 200+ CLIENTS IN UNDER THREE YEARS

- **EarlyFoods, trust-first e-commerce:** Food for expecting mothers and young children. Analytics pointed at price; nearly 400 customer survey responses said trust. Rebuilt the journey around sourcing and certification before price. Sales up 33% in a month.
- **Repos Pay, two-sided credit:** A partner app for pump owners extending credit and a customer app for businesses drawing it down: two sides trusting one system for opposite reasons.
- **ZuQA, API testing tool:** Progressive disclosure cut cognitive load and developer onboarding time by 15%.

SKILLS & EXPERTISE

PRODUCT & UX	End-to-end ownership · journeys and information architecture · interaction and visual design · prototyping · motion
CLIENT & DELIVERY	Stakeholder interviews · client presentations · competitor analysis · phased agile delivery · multi-tenant and white-label products
RESEARCH & EXPERIMENTATION	Usability testing · surveys · heatmaps · A/B testing · qualitative and quantitative synthesis
AI PRODUCTS	Human-in-the-loop review · guardrails · AI quality instrumentation · agentic design workflows
SYSTEMS & ACCESSIBILITY	Figma tokens and variables · component libraries · theming · WCAG 2.2 AA · RTL-first, logical CSS
DOMAINS	Fintech and payments · enterprise SaaS · consumer wellbeing · e-commerce · developer tools · edtech
TOOLS	Figma · Claude · Cursor · Figma Make · v0 · Lovable · HTML/CSS · Three.js · Adobe Creative Suite
LEADERSHIP	Hiring and mentoring designers · design critique · cross-functional collaboration with product and engineering

NOTABLE WORK

- **Job App Assistant:** a live AI web app designed, coded and deployed solo in one session (Node.js + Claude API): job-app-assistant.onrender.com
- **Aatmnirbhar Bharat mark:** entered in an open MyGov competition; the mark was taken up by the PM SVANidhi scheme and used by manufacturers marking Indian-made goods.

EDUCATION

Interaction Design Foundation · UX, UI and Interaction Design	2015 – 2017
Maya Academy of Advanced Cinematics (MAAC) · AD3D Edge+ Diploma: Design, Animation and VFX	2012 – 2014
Bachelor of Commerce with Computer Science · B.Com and CS	2011 – 2014
